Fuel	Gas
Heat output	8.2 kW
Heating capacity	150 – 240m ³
Material	Steel
Warranty	2-year warranty
Combustion technology	Ventless gas

PRODUCT DESCRIPTION

The Kratki Patio Light is an open gas fireplace that does not require flue pipe installation. This freestanding burner can be easily moved over flat surfaces (hidden wheels).

A beautiful fire vision is created by the large square modern ceramic burner. The four glass panels provide safety and also protect the flame from wind. The glass panels reflect the image of the fire to improve the visual flame effect further. Additionally, decorative elements (not included) such as stones or decorative glass can be used in PATIO to enhance the look of the heater.

Besides residential use, the Kratki PATIO is also a popular choice for restaurants, hotels and event companies where the fireplace is positioned at entrances, dining and leisure areas.

The surround of the fireplace consists of powder-coated steel making it more resistant to scratches.

The Kratki PATIO has a manual control to turn the fireplace on or off and adjust the flame height. The Maxitrol (Germany) advanced and safe gas control system is used.
