Fuel type	propan butan
Destination country	pl
Weight (kg)	63,0
The energy efficiency index EEI	37,00
Glazing type	lateral
Material	steel, glass
Width (cm)	46,70
Height (cm)	155,30
Depth (cm)	46,70

Features

PATIO is a stylish gas heater which provides heat and light wherever we want to create a unique and

cozy atmosphere. Its unique feature is fire visible on four sides. Thanks to this, it is the one and only gas or terrace garden lamp.

MODERN DESIGN

Patio Modern design suits almost anywhere. The heater can be an elegant decoration on the home's terrace or in the garden. It can be also used in restoration as well as hotel industry as an interesting addition to the dining and leisure area. The attractive appearance and pleasurable warmth of Patio will make gardens and terraces full of guests during spring, summer as well as winter evenings. Natural fire vision is ensured by the use of a modern ceramic burner. Additionally, decorative elements such as stones or decorative glass can be used in PATIO to enhance the look of the heater.

CONVENIENT USE

Patio does not emit any sounds or smell. Its activity does not influence on air circulation, what is particularly essential for allergic users. It is easy to move and place in chosen area due to equipped wheels. The device can work constantly with full power, continually up to 30 hours. The device is designed for 11 kg bottles. Patio does not require glass cleaning, since fire does not smoke them. Its launch is very easy and intuitive through one button located in the lower chamber of the furnace.

SAFETY ON THE HIGHEST LEVEL

PATIO is powered by liquid gas from the cylinder hidden in the housing. Flames are enclosed in a glass cell which shields us from direct contact with fire. This allows you to admire the game of flames under full control. The lower part of the device casing is made of steel, covered with powder paint. Thanks to this Patio is resistant to damage. The lower chamber of the device is protected against unauthorized opening by mounted lock in the door.

The upper construction of the heater ensures protection against the burning fire. Additionally, it evenly distributes the heat generated in it in four directions. PATIO is equipped with a special anti-tilt valve which in case of the device overturning automatically cuts off the gas supply to the controller, which extinguishes the flame. The device is not dependent from electrical system, that is why we are sure that even in the absence of electricity, it will illuminate the terrace or garden. The heater is equipped with a fully secured and advanced manual gas control system which prevents from uncontrolled fuel leak.
